

Dr. Plowright,
King's Lynn,

July 22 1902

My dear Colleague

Do you know any botanist
in the North of Italy who makes a practical
study of the Hymenomyces? There are
certain species I have never seen growing
such as Amanita Caesarea - Clathrus cancellatus.
etc - If you know of any one, I wish
you would put me in communication -

~~So~~ I think you allow me some discount
on the Sylloge? Tell me what and I
will send you a cheque for the amount

Yours truly

Matth. B. Plowright -
