

Newfield, New Jersey

Aug. 18. 1897

Dear Colleague

Will you do me the  
favor to give your opinion  
on the 2 inclosed fungi?

— No. 41 seems to be  
your *Leptostroma Jun-*  
*caccarum* — only the  
sporules are too large

— I hardly know where  
to place no. 359.

Very Truly Yours

J. B. Ellis
