England.
8 Nov 1899

My dear Saccardo,

Is the enclosed Spheria

Your. Thyridaria incrustans?

which is a plant I have never
seen.

Find your Michelia a
very useful book. Especially
such. & contributions as the
Enumeratio Pyrenomycetum Hypo-
creaeorum. which shows at a glance
what species are already known

and their spore measurements.
I hope you will take up some
other division of the ~~Tylenom~~
mycelia in the same way
before long—

I believe this Neetria which
I send herewith is new
Do you know it?

Believe me
Yours very truly
Charles B. Plowright.
