R. SCUOLA DI INGEGNERIA DI PADOVA

MODELLI

per l'insegnamento pratico della costruzione
dei ponti metallici, esistenti nel Gabinetto
di ponti della R. Scuola di applicazione
in Padova.

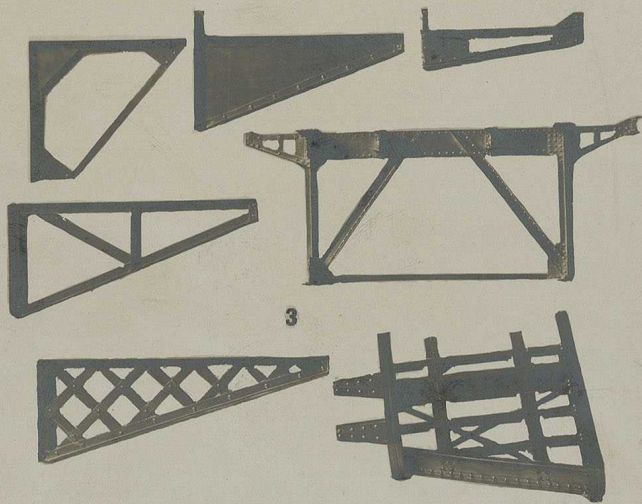

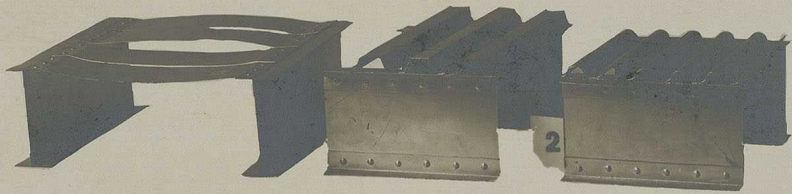

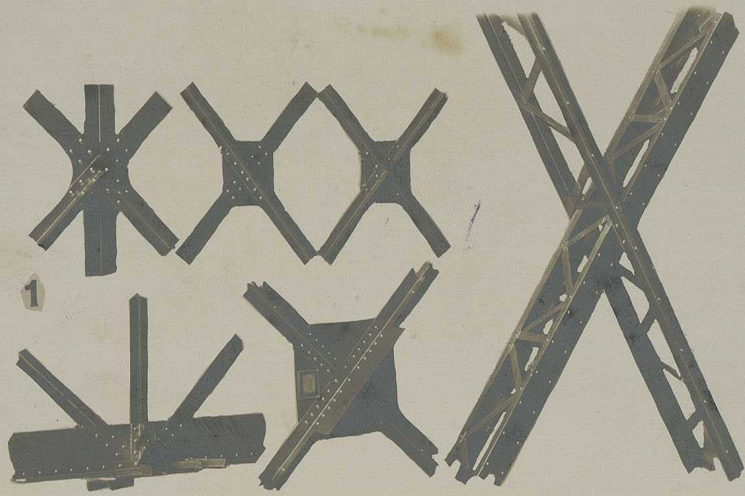

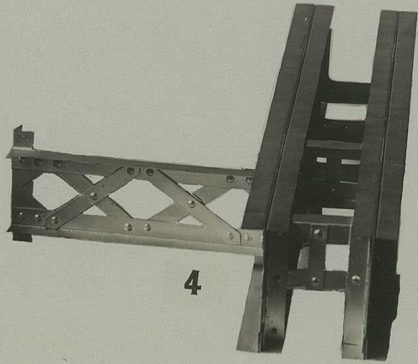

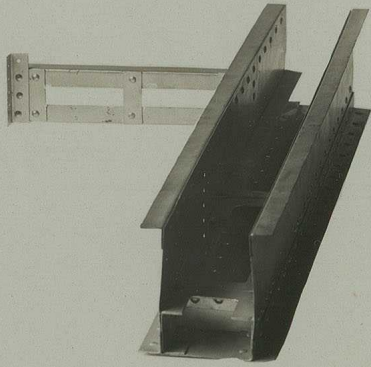

La maggior parte di questi modelli rappresenta, in grandezza $\frac{1}{10}$ del vero, particolari di opere esistenti. I modelli vennero eseguiti dal meccanico Nardin Carlo, inseriente della Scuola, sotto la direzione del prof. Pio Chicchi dal 1890 al 1899 e del prof. L. V. Rossi dal 1899 in poi.

ELENCO DEI MODELLI

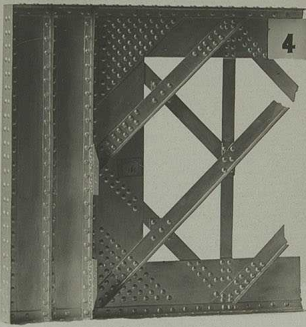

esistenti nel 1906

- N. 1 Particolari di attacchi ed incroci di ferri.
