

Prof Wiesner, Padua

10.A/19-002

Paris July 26 1858

Dear Sir

Your kindness towards me during my short stay in your city will always be a delightful remembrance of my Italian journey. Permit me to present to you a small acknowledge note in a little package of American plants, which I have transmitted to Prof Feigl at Vienna, for you.

The interesting *Cuscuta* found by you on Medicago in the neighborhood of Padua seems to me now, after inspection of original specimens to be *C. hyalina* Roth. -

Please pay some attention

to this plant. And if you should
meet with it again this season
please enclose a note about it
together with a fragment of the
a specimen to me

(Dr George Engelmann, St Louis
Missouri)

I remain, very respectfully

yours etc

George Engelmann
