

Gramineae orientalis var. *orientalis*
aut. com. Taubert et E. Speck
in Ann. d. sc. nat. 3. ser. 1880.

Tom. XIV n. 6.

Subgenus Litospis var. p. 351
p. 352

Spica gracilis elongata subterminali (spiculis
5-7. vel plur. subterminali) ~~hanc~~ *subterminali*
vix compressa caudata, glomeris valde exserti-
tis, glomeris palea externa 1-anthera vel
in spiculis brevibus inflexis exsertis.
Agrostis var. *orientalis* Pers. Berk. Berl.

Ag. speltoides Taubert p. 353.

Subgen. Cyrtogynum var.

Spica elongata compressa subterminali (spiculis
5-11 hanc ^{compressa} *subterminali*, spiculis
brevibus ^{compressis} *hanc* v. *subterminali*. Glomeris valde
glomeratis palea externa exserta aut 1-
anthera

Ag. speltoides 354
— *cyrtogynum*
— *caudata*

Subgen. Cyrtogynum var. 355.

Spica elongata compressa subterminali (spiculis
7-10 hanc ^{compressa} *subterminali*, spiculis
brevibus 2-3 antheris compressis. Glomeris
valde glomeratis palea externa exserta vel
1-anthera

Agrostis platythera nob. ill. pl. v. t. 313.
~~Speck 3 to 4~~ Sp. Ag. umbrosa. Dactyl. Ag.
sp. umbrosa. Cav. il. No 90 p. 2 (excl. ign. L.)
Cott. Dief. Boiss.

Agrostis Composita nob. 357.
Sp. altissima cum cava - ut ignis - ceterum
nuda e. sp. 2-3 arboris umbrosa, sp. 2
terrenis, an. 3-5 longioris, v. 2-3
terrenis - lumbis, sp. 2-3. Sp. 2-3
nuda, v. 2-3 an. 3-5
Ag. composita 1. 1. 1.

Agrostis Umbrosa nob.
Sp. gracilis elongata umbrosa, flexuosa e
sp. 2-9 v. 2-9 oblonga - lanceolata non
umbrosa, sp. 2-9 terrena, an. 3-5
caudata. Sp. 2-9 v. 2-9 exaristata. Sp. 2-9
galea exaristata in sp. 2-9 terrena, exaristata
nuda, in sp. 2-9 terrena, flexuosa
dactyl. sp. 2-9 longioris, v. 2-3
Ag. maxima nob. ill. pl. v. tab. 315.

Agrostis Composita nob. p. 358
Sp. gracilis elongata lumbis, flexuosa, umbrosa
sp. 2-9 v. 2-9 oblonga - lanceolata non umbrosa.
v. 2-9 oblonga - lanceolata non umbrosa.

Gleamly pale extreme spine whitish - much
inner as gleam color in slightly orange
exanth.

Reg. trigonoides nob. ill. pl. v. t. 200.

Spirals sub 5-flor. Gleam color ^{conspicuous - others}
apex ^(spiral lobes) ~~bicuspitate~~ et in ^{some} ~~some~~ ^{extensive}
undulate -

Reg. lobacea nob. l.c. t. 317.

Spirals sub 7-flor (5-8) gleam subnormal
long. my. gleam color ^(spiral lobes) ~~conspicuous~~ apex
bicuspitate et in ^{some} ~~some~~ ^{extensive}
undulate or subtypical ^{undulate}.
