

Simla,  
India.

15<sup>th</sup> September 1890

Dear Sir,

I have received a letter from my friend Dr. George King of Calcutta in which he tells me that you desire to see my humble Contributions to Mycology. I feel much honoured by the request, & comply with much pleasure.

The third & concluding part of my Descriptive list of the Simla Uredineae is now being published & when ready a copy shall be sent to you.

I may mention that I have

Several papers now before the Linnean Society of London, & these you will doubtless see. They are:-

1. Life history of *Uromyces Cunninghamianus* on *Jasminum grandiflorum* L. (autoecious)
2. Life history of *Pucc. coronata* Cda var. *Himalensis* (heteroecious)
3. Life history of *Pucc. Geranii-sylvatici* Karst. (autoecious)
4. Life history of *Pucc. Jasmini-Chrysopogonis* (heteroecious)

I have also a paper now being published in the Botanical Gazette London (Britain) on Some Rusts & Mildews of India.

I have sent a copy of all my already published today

but you will probably receive them  
a week later.

I remain, dear Sir  
Yours very truly  
A. Barclay.
