

My dear Sir

I have instructed Mr  
Ulrico Stapli of Milan  
to pay you for me the  
sum of twenty one shillings  
(21<sup>s</sup>). I have lost your  
card and do not re-  
member how much I  
should send you

Permit me to remind  
you that I find in your  
specimen n° 998 Hendersonia  
fusarioides good asci  
which are clavate, and  
contain sporidia in two  
rows

n° 998.

- Certainly my  
specimen is a very  
good Sphaeria &  
not Hendersonia

Have you published specimens  
of Hendersonia pulchella - I  
if not - could you send  
me a small specimen  
perhaps also you may have  
fragment of Hendersonia  
Sarmenticcia or of Hend.  
biseptata

I am deficient figs 154  
in your Fungi Italici - as  
I sent away the single  
specimen plate you sent  
me to a Mycologist in  
hope of securing you a  
Subscriber

I am preparing a revision  
of the genera Hendersonia  
Darlucia &c and hope to  
have your assistance if

you can favor me with  
specimens

Hendersonia typhloidearum  
var Luzula - published  
in Thumen's Fungi Austriaci  
is a Sphaerella

Hendersonia Cyroscata of  
Thumen's Fungi Austriaci is  
Exosporium fructicola Sacc

I think the enclosed is  
the Hendersonia Saubinetii  
of Montagne

Yours truly

W. M. Moore
