

Dear Sir

Thanks for your letter.
I had observed & described
the Pocillum under name
of Pocillum americanum
which will be published in
next n.º of Grevillea. It was
sent to Berkeley & Phillips
under this name 2 months
ago. I did not know
any specimens were on the
leaves sent to you.

I note the other remarks
but at present do not see
the necessity for the genus
Fracchiæa

I think your Cookea?
microscopica would be
very near Asterina -
which is sometimes -
without hyphæ. Nearly
all Thümen's species of
Uleliola are asterina
Thanks for complement, but
there is Cookia in Phanerogams
= Ullcooke
