

Peziza N<sup>o</sup> 1. is Peziza rubra (see  
vide Mycographia).

Peziza N<sup>o</sup> 2. is immature. I can  
find no sporidia - hence I do  
not know if they are rough or  
smooth - or what their size. If  
you can send it again when  
mature, I will then inform  
you if it is P. lentiformis P  
which it most resembles, or  
it may be a new species.  
I cannot say without sporidia  
ellloohel

UNION POSTALE UNIVERSELLE
