

146. Junction Road  
London N

My dear Sir

I would lend you for  
a month the following works

1 "Schweinitz Synopsis fungorum"

2 "Berkeley & Curtis, Fungi of North  
Pacific Exploring Expedition"

3 "Cryptogamia of Antarctic Voyage  
of Hooker - by Berkeley &c" 17/11

But these are all I have

I have never seen Schweinitz  
description of New American Sphaeria  
in Acad. N.S. Philadelphia. I  
think the species were included  
in the "Synopsis". There was  
a reprint of the diagnoses

of the species by Schweinitz -  
in an early volume of the  
"Linnaea". (I think, but I  
have it not.)

I have not the

"Hooker's Flora of New Zealand.

nor

"Hooker's Flora of Tasmania"

all the species are omitted from  
Strinz "Nomenclator" <sup>150</sup> 285M.

When I require these very  
expensive works I consult  
them at a public library.

//  
If you wish me to send  
such books as I possess they  
are too large for post, and

must be sent by Railway

Let me hear from you  
again, whether I shall send  
you 1. 2. 3.

Yours very truly

M. Cooke

Dec. 19. 1881

Prof. P. A. Saccardo

MS. Found to day in Kew  
Library the paper of Schweinitz  
and enclose names of 20  
species, with reference to  
"Linnæa" Dec. 20/81
