langue. Je me permets de vous offrir pour le
"Grevillea" ce que *sait*:
P. A. Saccardo - Nova Ascomycetum genera.

P. A. Saccardo — Nova Ascomycetum genera.

~~Disconjecturae et aliorum~~

I. Frachiaea Sacc. Spec. Myc. Ven. 115. tab. XII f. 3-7.

Perithecia carbonacea, aggregata v. subsparsa, erumpentia, v. corbice Delapso, superficialia, macula strumatica nigricante insidentia, ostiolo denique umbilicato. Asci polyspori, paraphysibus nullis obvallati. Sporidia valsea, i.e. cylindracea, utrinque rotundata, curvula, hyalina. uv. Ex. Spec. :

Undata, curvula, hyalina. — *Ec. Species:*
Q. heterogenea Sacc. l.c. ^{of mycoh. Ver. I n° 88 1/2} — *Obs.* Genus affine

Coelosphaeria Sacc. (= Nitschkeia Otth), sed asci polyspori.

II. Thyridaria Sacc. Mycolth. Ven. II. n° 170.

Perithecia carbonacea, aggregata v. subsparsa, crusta
thomatia nigricante subcorticali insidentia et cum
ea in acervulos subvalseos connexa, tecta dein
erumpenti-liberata. Asci octospori, paraphysis
bus copiosis obvallati. Sporidia oblongata ^{gemmae}

multilocularia, non uniformia, fuliginea. — Species:

Thyridaria incrustans Sacc. l. c. - Cucurbitaria Brongn.
netiae Sacc. Mycol. Ven. 118. tab. XII f. 12-17.

Obs. Genus stromaticum Thyridio affines et ab eo in
primis sporidij non muriformibus diversum.
