

(\*) Come era solito in quei tempi anche all' Herb. falliva spesso il conto del genere e vediam ben spesso che delle specie ben note della nostra flora di un altro genere s' agoriz <sup>o</sup> intende e non meno diverge <sup>o</sup> esprime dalle basiconie che appaiono nella generazione <sup>o</sup> comparizione car torpes peculiariter reconoscitur qua in agro Bellunensi et Fivensino nel fronte occulant vel ante excludunt; opera per tan long. totta e diverge, basata precipuamente sulle distinzioni bot. richi del Tournefort; dove però la prec. nomenclatura delle piante è così confusa e così moltiplicata a designare le più brevi variazioni, che anche per le specie indicate come bellunensi il più delle volte la identificazione è impossibile. Si poteva sperare che gli originali del luc Herbario fossero un prezioso documento per determinare il valore dei addetti nomi del Tractatus; ma fatalmente non è così, perché le designazioni specifiche nell' Herbario sono per la maggior parte una reazione dell' Agoriz ed anche le disposizioni dei generi lungi dall' essere come è indicata nel prototipo, e vaga e altuaria, torvando sta riamati tratto tratto dei gruppi naturali, come Umbellifere, Compositae ec., ma non tutte in un luogo. Si dice che l'autore preparasse creare <sup>dei nomi nuovi</sup> che applicare l'altre nomenclatura. Comunque la collezione è ricca di specie e di varietà e poiché è stata dispendiosamente preparata e trovasi tuttora benissimo conservata poiché essere determinata con facilità e sicurezza, tolle poichissimi cap. Essa rappresenta ben la flora Bellunense specialmente quella del piano, del colle e della monte prealpe, distendendo solamente dalle piante delle zone più elevate. Di ogni specie senza l'incerto il nostro Agoriz ci presenta, per le più, parechi saggi differti per istatura, colore dei fi. indumenti ec. e (curiosa cosa!) quasi sempre dislocati <sup>o</sup> torvati <sup>nell'Herbario</sup>. Vi sono pure i saggi di numerosi specie e varietà di piante coltivate nei campi e nei giardini e utile documento per la storia dell' introduzione delle piante estranee nella nostra cultura.

Segue ora l'Enumerazione Sistematica delle piante si spontanee  
che coltivate dell'Erbario Apostolico. Vi aggiungo i nomi <sup>imprimiti</sup> dell'autore  
e la citazione del <sup>no</sup> foglio ove li trovano appollinate. La lettera  
a, b, c, d, ecc. indica la locazione nello stesso foglio. Le piante usate  
invece nell'Appendice II. vol. sono accompagnate dall'abbrev. a. V. p. Le  
piante esotiche sono munite d'un asterisco (\*).

Ritornando a

Intorno al 1824 il Dott. Roberto De Vignani, allora assistente  
a D. Botanicum e più tardi rinomato professore di Botanica  
nell'Univ. patavina, ~~rispose~~ <sup>rispose</sup> - rispose botanico l'agru  
Bellunese e soffermatosi a Belluno ~~rispose~~ <sup>rispose</sup> si recò a vedere  
ed esaminare prima il Dr. Giuseppe Tamboni un vecchio storico  
bellunese, quanto a quest'ultimo dal suo autore ~~fu~~ <sup>fu</sup> del  
1783 dal Dott. abate bellunese Co. Giuseppe Agosti.  
Nato quivi nel 1715 da nobile famiglia bellunese  
in Belluno, ~~si~~ <sup>si</sup> era privato dell'opera sua cara in  
tanta età cioè tre anni avanti ~~la morte~~ <sup>la morte</sup>, che  
arrivò nel 1786. L'Agosti fu uomo studioso e  
colto, oltre che fu ed essendo entrato nell'ordine de'  
Gesuiti insegnò nei loro collegi di Tagliata, Belluno,  
Bozza San Giovanni. Sempre incline allo studio volse  
viva, nella sua vita scorse in patria in amore  
la flora e ~~fructu~~ <sup>fructu</sup> e spendendo ~~molto~~ <sup>molto</sup> del suo luogo  
nativo, dove ~~tanta~~ <sup>tanta</sup> ~~lo fece~~ <sup>lo fece</sup> nel 1773 ~~al suo grande~~  
fu soggetto l'ordine ~~ca~~ <sup>ca</sup> ~~apparente~~ <sup>apparente</sup>. Giunto a  
lungo studio fu l'opera botanica che pubblicò con  
Belluno nel 1770, in 4 volumi a 4° di 600 pag. del  
Titolo de re botanica tract.

L'autor parve al suo libro ~~di~~ <sup>di</sup> come delle opere  
per de ~~vegetal~~ <sup>vegetal</sup>, che lui vedeva, quindi alle opere  
che ~~si~~ <sup>si</sup> ~~generale~~ <sup>generale</sup>. Segue l'espansione botanica  
de generi ~~per~~ <sup>per</sup> ~~altre~~ <sup>altre</sup> ~~comenti~~ <sup>comenti</sup>, ~~desunti~~ <sup>desunti</sup> ~~i per~~ <sup>i per</sup> ~~delle~~ <sup>delle</sup>  
opere ~~per~~ <sup>per</sup> ~~altre~~ <sup>altre</sup> ~~comenti~~ <sup>comenti</sup>, ~~desunti~~ <sup>desunti</sup> ~~i per~~ <sup>i per</sup> ~~delle~~ <sup>delle</sup>  
che ~~alla~~ <sup>alla</sup> ~~facile~~ <sup>facile</sup> ~~la~~ <sup>la</sup> ~~penetrazione~~ <sup>penetrazione</sup> ~~in~~ <sup>in</sup> ~~note~~ <sup>note</sup> ~~che~~ <sup>che</sup> ~~l'opera~~ <sup>l'opera</sup> ~~informazioni~~ <sup>informazioni</sup> ~~delle~~ <sup>delle</sup> ~~opere~~ <sup>opere</sup>

[illegible]

(1) Molte piante furono donate dalle fucine - gran parte  
per consumo delle navi. Le specie più importanti sono:  
le piante giovani raccolte di L. A. C. e altre specie del Jap.  
Trametes, Boletus, Morchella, Amanita, etc.
