

California Academy of Sciences.

Post Office Box No. 2247.

San Francisco, Aug. 18th 1885

Dear Sir:

Your postcard of July 27th ~~of July~~ is just received, and I send you by this post the separate print of Bulletin N^o 3 and Bulletin N^o 2 for which you ask

By some oversight the edition of this was very small and only served for distribution to the Societies on our exchange list. As I have no particular use for my copy however please do me the favor to accept it. You will see that it only concerns minerals.

The Academy of Sciences has never received any copy of your *Sylloge fungorum* ^{Vol III} excepting that forwarded to me in care of the Society, and for which I enclose the receipt of the sum forwarded in payment last February.

A set of your publications, including *Michelia*; and *Delimitations of fungi* were ordered by me last year for our Viticultural Society

and duly paid for, but did not include
Vol. III of ^{your} work which was not yet
published. If any misunderstanding
has occurred, and you have forwarded
books not accounted for, please let
us know at once, and I will try
to trace up the matter.

As an Honorary member of our
Society you are entitled to all of our
publications issued after the date of
your election.

Sincerely Yours,

A. W. Hackness
