

Department of Agriculture

(Pathologist's Branch),

Melbourne, 30/4/ 1900

Dear Sir,

In a copy of your
Sylloge Lingorum obtained
through Wesley & Sons London
a curious mistake occurs
In Vol VII Part 1, pages 17th 32
are inserted but they do not
belong to this volume being
repetitions of similar pages
in Vol. VI dealing with *Boletus*.
Hence the proper pages similarly
numbered & dealing with
Clathrace are not given at
all. As I wish to bind the

XII volumes, I have written to
London to have this mistake
corrected, but also write to
you to see if you could
supply the right pages
viz 17 to 32 for Vol. VII Pl.
It is a most unfortunate
mistake

Yours faithfully
J. M. Alpine

P.S. I enclose 2 copies of
Pamphlet on Locust fungus.
I understand that Spezzazini
has found *Sporotrichum globuliferum*
but have not seen his paper.
Would you kindly let him
have one of these copies & oblige
J. M. Alpine
