

7/10/91.

In my letter by
last week's mail,
dear Prof Saccardo,
I forgot to men-
tion, that I regard
many of the
Agarics and
other fungi here
as introduced
30 and 40 years
ago I did not
observe several
of them. Nothing

would be more
likely than fungus
spores being carried
by emballage. In
the same man-
ner mosses have
immigrated here
to my own know-
ledge, for instance
Bryum argenteum,
now common,
but not many
years ago.

With respectful
remembrance yours
J. W. Mueller.
