

31/8/94.

You will receive
seven (7) small
packages of fangs
by this week's
mail, dear Prof.
Saccardos. all
unico here, so
that I should
feel obliged, if
you could send
back any, which
you may have along
from other localities.

It is not likely
that any of these
fungi are addi-
tional to those
described in
Dr Cooke's Austra-
lian volume,
as a large num-
ber also of his
tropical species
~~may~~ came from
my collections.

through many
years. Let me
hope, that you
will find among
them new kinds
for your own
collections. In
some instances
the species may
admit of being
divided into 2,
so as to be ~~repre~~
sented also in
the museum here

Is it possible
for you to examine
fungs at any
time from here?

With respectful
remembrance
yours J. S. Mella
