

8/3/95

Allow me, dear
Prof Saccardo, to
place before you
the enclosed spe-
ci'men for the
valuable opinion
of yours as that
of a leading spe-
cialist.

Would you find
it possible to com-
pile a Census
of ^{quarantine} fungaceous
plants in confor-

mity with my
Census of the
order plants of
Australia? You
may be able to
improve on what
has been done by
DeCoke in his
special volume.
In 1898 the third
Census is due,
and I have asked
now also Sargent,
J. Mueller and
Wrothorn, whether

they, - perhaps
by the help of local
University-Students
would be able
to put together
such a list, so
that the Encarta
could also
appear in the Census
of 1896. In your
case your great
work and Cooke's
volume would need
to be cited. Most
respectfully yours
Anderson Mullin
