

October 4th 1881

Albany, New York.

State Museum Nat. Hist.

Prof. P. A. Saccardo

My Dear Sir;

I send you by mail a duplicate series of the Reports and papers containing diagnoses of new species of fungi, so far as I am able. I send also a Memorandum of corrections in a separate envelope, for many errors have occurred in the Reports which it is my wish should not be perpetuated.

I desire to be a subscriber to the Sylloge Fungorum Omnium, so long as I maintain my connexion with the Museum. If I should by reason of ill health or otherwise be obliged to give up my pursuit of the study of fungi, I do not

wish to bind myself to
continue my subscription till
its completion. If you can
send it to me on this condition
you may enter my name in
your list of subscribers.

Dr. H. W. Harkness, Sacramento,
California, also expressed a
wish to me sometime ago to
subscribe for it and requested me
to mention it to you.

Very truly Yours
Chas. H. Peck.
