

OAKDALE

State Hall, Albany

Aug. 14th 1886

My Dear Sir:

The spots on
leaves of *Fraxinus* are suffused
with fungus spores. I am
unable to locate the species.
What is it?

The State Museum of Nat. Hist.
has received Fungi Italici

Fasc. XXXVII - XXXVIII (cum indice
Alphabeticis totius operis) -

Did you send it as a Contribution
to the Library or for sale?

Very truly Yours
Chas. H. Peck.
