

Stockholm, Karlavagn 28 - ²⁴/₂ 89.

H. Her Professor!

As I today received a letter from Prof. Cooke with decision about

N:o 35 = 48 "*Crumenula fetulosa* Rou. n. sp."

" 49 "*Helotium palicellum* Fr."

" 50 "*Pateuaria Cratagi* Phil. Grav. xVII 46,"

which I sent him together with the advertisement about my questioned *ellicat*, I hasten to inform you of his decisions in order to avoid at least some trouble for you, as I can imagine your time is very much occupied.

Concerning n:o 49 I remark that it is possible or even likely that Fries has included it in his *Hel. palicellum*, but still I dare to doubt that it by rights belongs there. At any rate it will be the best to let it pass under that name till it has been compared

with typic Hel. palicellum.

No 46 Colpoma serrulatum Rouss vix, sed
Colpoma pseudographioides Rouss forty nimis
affine Clithr. crispa (Pers.) Rehm. Fungi Lar.
no 2108. I regret that the work of Rehm
was not in my hand at the determination.
24. 2. 1889.

Yours obedt.

Lars Rouss
