

Karlaegen 28 Feb. $\frac{3}{10}$ 91.

Dear Sir/

For Abruzzasia, Recommandations
pour les Phylographes, Intorno ad una precursore
analisi microscopica degli essenceti, L'inven-
zione del microscopio comparito and
Sylloges fungorum Supplementum universale
please accept my best thanks.

I would feel obliged, if I might pay the
last ^{and first} mentioned work with some of the follo-
wing fascicles of my exsiccata. The first
centuria was intended as a slight tribute of
gratefulness for earlier assistances with deter-
mination of fungi etc.

Sincerely Yours
Lars Romell
