

Dear Sir

Genoa
27th Febr.
1899

I am sorry to say,
I have no specimen of
Sphaerostheca fugax in my
collection. Prof. Saccardo,
who examined my fungi
from Mount Generezo with
me, kept the whole collection,
and if you like to examine
the species mentioned, you
ought to ask it to Prof. Saccar-
do in Padua.

I sent you, some days
ago, two pamphlets relative
to new fungi from Java;
perhaps the new Eurotiaceae
(*Myriococcum* sp. and *Cryptothecium* nov. gen.) will be of some
interest for you.

Believe me, dear Sir, very
Sincerely Yours
Prof. C. Peziz
