AGRICULTURAL EXPERIMENT STATION.

Officers of the Station:

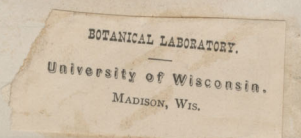

W. A. HENRY,
PROF. OF AGRICULTURE.

WM. TRELEASE,
PROF. OF BOTANY AND HORTICULTURE.

H. P. ARMSBY,
PROF. OF AGRICULTURAL CHEMISTRY.

Madison, Wis., Dec. 14, 1883.

Professor A. Saccardo,
Padua, Italy.
Dear Sir:

Make me liberty of writing to learn if
you can favor me by exchanging parasitic fungi
with me. Doubtless you already have most of the
American species which I can send you, but I
have a number of new or rare species that
you would perhaps find of interest. That I
should most like would be imperfect forms such
as *Cercospora* etc., that have passed through your
hands. In case the demands on your
time will allow you to do me the favor
asked, I shall take pleasure in making up
for you a parcel of 100-200 numbers, in
Almanac, on my return from the Johns Hopkins Uni-
versity where I shall spend January as lecturer
on botany.

Believe me,

Very truly yours,

Wm. Trelease.
