

THE MISSOURI BOTANICAL GARDEN.

WILLIAM TRELEASE, DIRECTOR.

PLEASE ADDRESS CORRESPONDENCE
TO THE DIRECTOR.

St. Louis, Mo., Oct. 28, 1901.

Dear Professor Saccardo:

I am delighted to know that you and Dr. Scalia have made in the neighborhood of a hundred species from my last lot of Alaskan fungi, and of course I am delighted to find that so many of them are new to science.

As the list which I already have in manuscript includes a very large number of species in addition to those which you were kind enough to determine for me earlier, I think that it may perhaps be better if you will kindly send me these added lists, descriptions and plates, permitting me to incorporate them in their proper place.* The authority for the species described and the determinations will be definitely given, of course, in each instance.

Very sincerely yours,

Wm. Trelease

Professor P. A. Saccardo,
Padua, Italy.
