Dr P. A. Saccardo.

Dear Sir.

I am sending
you in a package
by mail a "slide" of
Protocarinospora.

If you examine it
carefully you will
find basidia which
bear several

spores, also you will
note the hymenium and
subhymenium.

The basidia are first
formed within the
epidermal cells. I intend
before long to publish
a more extended article
which will be illus-
trated.

Very sincerely yours,
~~Geo. H. Wilson~~
