

Singapore
Sept. 17/17

My dear Sir:

Another package of Jungi goes forward to you in this mail. It contains some very important material from Seneca brasiliensis. There is great confusion here as to the Jungi and diseases of Seneca and determination of these things and others which I will send will be very important in connection with rubber work. I hope you may be able to give me an early report on them.

Yours very truly
C. D. Baker
