

Hanover, N. H., April 5, 1919.

Dr. P. A. Saccardo,
Padua, Italy,
My Dear Dr. Saccardo;

I take pleasure in forwarding to you, under separate cover, as complete set of my specimens of *Chaetomium* as it is possible to distribute.

These specimens have been on my shelf since the outbreak of the recent war, but on account of the uncertainty of the mails I have hesitated to forward them until the present time. With these I take the liberty to send my thanks and sincere appreciation for the help which you were so willing to offer me at the time of the work.

Hoping that these arrive to you safely,
I remain

very sincerely yours,

A. H. Chivers
