

# LONG'S PEAK INN

ENOS A. MILLS

ESTES PARK, COLO.

August 2 1908

Dear Professor Saccardo:

In a few months I expect to publish a key to all the genera of the fungus found in volumes I-IV of the Sylloge Fungorum, as well as of the lichens. But this will be given a glossary of the English terms, and a Latin vocabulary to the Sylloge so that the beginner may use it more readily and certainly.

In this connection, I would like to make you, *Protonotaxia* available to English beginners who use Latin little or not at all. I would like to secure your permission to make an English translation of the last edition, as well as to use the lithograph plates also. Will you kindly write me in regard to these matters at your early convenience, addressing me at the University of Minnesota, Minneapolis, Minn. With sincere regards

Fredrick C. Converse
