

G. P. CLINTON, S.D.,
Botanist.

THE CONNECTICUT
AGRICULTURAL EXPERIMENT STATION.

New Haven, Conn.,

Jan. 22, 1912.

Professor P. A. Saccardo,
Royal Botanical Institute,
Padova, Italy.

Dear Professor Saccardo:

I should like very much to obtain a specimen of
your Endothiella gyrosa, described in Annales Mycologici
4- 1906, page 273, and also, if possible of Endothia gyrosa
on chestnut or other hosts, if you have herbarium specimens.
I shall be glad to return such ^{other} specimens as you may desire,
if we have such.

Very truly yours,

G. P. Clinton
