

UNIVERSITY OF MONTANA  
MISSOULA

THE STATE UNIVERSITY

June 18, 1918.

Dr. P. A. Saccardo,  
Via Balludi n. 16,  
Padova, Italy.

My dear Dr. Saccardo:-

Am sending to you in separate cover copies of several articles of mine for which you write some time ago. I delayed sending them as I have several others in press that I expected would be published long before this.

Am very sorry not to have the two articles by Patouillard on Philippine fungi which you desired to see, and so am unable unfortunately to send them to you.

Am sending you several papers additional to those requested by you. The following is the list;

Additions to the Basidiomycetous Flora of the Philippines  
Philippine Basidiomycetes, II.

Basidiomycetes Collected in Indo-China by C. B. Robinson.  
Bibliography and New Species of Philippine Fungi.

Fungi and Lichens From the Island of Guam.

Should you notice any omissions in the Bibliography I would be very glad to have you let me know of them, as I wish to bring it up to date and include any omitted articles. Will forward you copies of the other articles as soon as they are published. I would esteem it a great favor if I could receive such of your valued articles as you would care to send me. With best wishes and sincerest regards

Yours very truly

*Paul W. Graff*  
Should these publications fail to reach you because of the unfortunate conditions kindly let me know and I will be glad to send you other copies.
