

46 Duchess Road, Birmingham
England.

Dear Professor,

Will you be kind enough to
alter the name of Gloeosporium
Phillyre (Journ. Bot. 1912, p. 53) into
G. phillyreinum Grove. — Do you find
Centrosepora Lauri on Laurus nobilis in
Italy? What we call by that name here
is on Prunus laurocerasus (never on the
true Laurel, as Greville mistakenly said.)
We call both plants "Laurel." I should much
value a specimen. Tibi deditissime W.B. Grove. IV. 14
