

Telephone N° 68. Central.

THE UNIVERSITY,
EDMUND STREET,
BIRMINGHAM.

Mar 26th 1915

Monsieur et cher collègue,

With this I take the liberty
of sending a *Fungus* on leaves
of Kennedya sp. from
Australia. If you can
tell me whether it has been
previously described or not
I shall be very much obliged.

It seems to be one of the
Rhytisma-group, but has

uniseptate spores.

Writing this as I am
so soon after the glorious
news of the participation
of Italy in the War of
Freedom, allow me to
add my felicitations to
all Italians on their noble
determination, & remain

Yours ever sincerely

W. B. Stone.
