London. W.,  
22, Nov. 1909.

Dear Sir,

I have now a further fascicle  
of about 15 more species of my English  
Agarics—all very fine specimens, making  
the Collection more complete.

Shall I send them to you?

There were some errors in the names of  
certain species in the former sets.

If you liked to send the collection back  
to me, I would revise all and correct any  
errors, without charge, and return all with  
the new species I have.

I have just revised the collection of my  
Agarics for Munich, and returned all with  
new species—it was a great improvement.

I wish to make your Collection as fine as  
possible.

With the greatest respect,  
Yours faithfully

Ch. E. Hartley-Smith.
