

26, Cranbrook Road, Chiswick,
London, W.
England.
27 July 1905.

Dear Sir, I send you a set of my
Agarics for your inspection.

I find it is the same whether I send
1 or 2 sheets, or a set.

There are 48 species, with a few
duplicates

I continue to collect, and shall have
another 50 species by the end of the
Autumn.

The species are I think very correctly
determined. I have carefully compared
them with the best illustrations and
descriptions, and noted all points.

I enclose bill in case the specimens
are taken.

Yours faithfully,
Charles E. Hartley-Smith.

Agarics collected by Mr. Ch. E. Hartley-Smith.
England.

Leucospori

48 species.
51 specimens

Amanita

Agaricus phalloides, Fr

A. muscarius, Linn

A. rubescens, Pers.

Lepiota

A. procerus, Scop.

Armillaria

A. melleus, Bahl.

Tricholoma

A. equestre, Linn

A. nudus, Bull.

Clitocybe

A. dealbatus, Sow.

A. flaccidus, Sow.

A. cyathiformis, Fr

A. laccatus, Scop.

A. amethystinus, Boll. var.

Collybia

A. maculatus, A. & S.

A. butyraceus, Bull.

A. velutipes, Curt.

Hyporhodia.

Pluteus

Agaricus cervinus, Schaef.

Termini

Pholiota.

Agaricus aegerith, Fr.

Pratellae.

Hypoloma

Agaricus fascicularis, Huds.

A. velutinus, Pers

Coprinus.

Coprinus atramentarius, Fr.

Cortinarinus.

Inoloma.

Cortinarinus rublanatus, Fr.

Dermocybe

C. cinnabarinus, Fr.

C. cinnamomeus, Fr.

Telamonia

C. armillatus, Fr.
