Professor P. A. Saccardo

Avellino Casa

Trotter, Italy

My dear Professor Saccardo:

Your card regarding my publications on bulbils has just been received. I take pleasure in sending you, under separate cover, a copy of these articles. You will find on page 236 a reference to Berles and Mattiolo, and also on page 297 a reference to *Stemphylium* ~~and~~ *Magnusianum*. I seem to have overlooked the work done by Peyronel. I do not recall seeing anything written by him on this subject.

Hoping that these articles reach you safely,

I am

Yours very truly,

J.W. Hotson
Asst. Prof. of Botany.
