

Royal College of Science,

Stephen's Green, East,

Dublin, 2 - 12. 1902.

Dear Sir

I have your splendid
work - Sylloge Fungorum -

and I Funghi Parasitici

of Brisi u. Cavara and
have been trying without
success to buy a copy of

Tom Fungi Italici

autographe delineati

Tab 1-1280.

If you could help me to get
a copy I should be extremely

obliged. I have this
Department's authority
to buy the work.

You will I think be interested
in seeing the enclosed
canker in the Salix from
the west of Ireland.

In the older material I
have found a Diplodia-
stage and a Osthyosphaeria
and in the fresh material
a stage suggesting a
Dendrophoma.

Apologising for troubling
you

I am
Yours sincerely
J. Johnson
