

New York Botanical Garden,

March 10, 1910.

Professor of Botany,
University of Padua,
Italy.

Dear Sir:-

The regular publication of *Mycologia* is now assured, and future volumes are expected to be fully up to the standard set in the first volume, the contents of which are tabulated in the enclosed. This volume consists of 290 pages, with 16 plates and 5 text-figures; and 20 species of mushrooms are illustrated in colors.

We should be glad to add the name of your institution to our list of subscribers for this publication.

Very truly yours,

W. A. Merrill

Assistant Director.
