Stockholm June 11th, 1914.

Mr le Prof. et Dr P. A. Saccardo

R. Orto Botanico

PADOVA

Your Sylloge fungorum vol. XXII arrived hier on Sept. 2, 1913, just when I was starting for a trip to Germany for comparing some fungi with specimens in the Herbarium at Dahlem, and I therefore had no time to look in it for the moment and after my return I was so overwhelmed with business which had accumulated during my absence that I forgot to settle this matter.

Finding that this vol. XXII contains no Hymenomycetes, the only section to which I now can devote my attention, I was disappointed and would have preferred to return the volume, though my long silence and failure to do this at once made me doubtful whether you could accept this proceeding as fair play.

The expense being considerable, however, and my income small, I hereby venture to inquire if you will allow me to return the volume and pay the porto for it.

Supposing that I get your allowance to do this, I beg you also to state the address to where I have to send it. The volume is quite fresh and unused, not even cut open.

Supposing that you prefer to sell the volume at a reduced price rather than to have it returned, please let me know the cheapest rate and I will ask f.i. Mr Vestergren if he may be willing to take it for that amount.

By this opportunity I beg to ask if you still have any copies of your excellent Chromotaxia for sale. In such instance I would be obliged for having two (2) copies despatched to my address. On a copy just lying before me the price is stated to be two (2) it. lib. (francs). I send you to day pr money order Lire 5.-, supposing that the porto will not exceed one fr.

Thanking you in before hand I beg you to kindly pardon the trouble and to believe me to be

Faithfully yours

Money order

L. Romell
