(UNIVERSITY OF LONDON.)

SOUTH-EASTERN AGRICULTURAL COLLEGE,

WYE, KENT.

England.

July 10. 1916.

MYCOLOGICAL DEPARTMENT.

FROM
E. S. SALMON.

Dear Prof. Saccardo,

I have raised about 200 seedlings from the seed of Humulus lupulus which you kindly sent me. I shall study this summer the variation shown by them. It would be a great help to me if you could tell me the names of any Italian Floras where I could find the species described in detail. Do you know of any Italian botanist who has specially studied the wild H. lupulus in Italy, as if so I should like to correspond with him.

With kind regards. Yours sincerely,
E.S. Salmon.
