Dear Sir:-

I am very much interested in the fungus Hypochnus Ochroleuca of Noack. I have a copy of the original bulletin in which he describes this fungus as Hypochnosis. I note the description which you give in the Sylloge under the name of Hypochnus Ochroleuca Noack in litt. Can you inform me where Noack published this, if it has been published yet. Have you any specimens of this fungus? If you have and would loan them to me, I would use them with exceeding care and return them to you immediately.

Yours truly,

F. L. Stevens
