Dear Sir,

I am sending you a copy of my paper on
a disease of apple trees caused by Monilia cinerea
and hope you will receive it safely.

I am continuing to work on the Monilias of fruit
trees and am anxious to obtain a specimen of M. laxa
If you could forward me a specimen of apricot bearing
this fungus, or could refer me to some person who could
obtain such for me, I should be most grateful.

Yours faithfully

H. Wormald
