5 vols. of together 1808 pp. with numerous plates and illustrations.

Lex. 8vo.

Catalogue-Price 40 guilders; now

temporarily reduced at 20 guilders (£ 1.14:\$ 8), sewed

In order to illustrate the great importance of the researchwork of our compatriot for biology in general I am citing here the opinion of the rekknown bacteriologist d'Hérelle:

„On a beaucoup discuté la conception de Beijerinck, mais je ne pense pas qu'on en ait saisi toute la profondeur. Toute, la biologie reposait, repose encore, sur l'hypothèse fondamentale que l'unité de matière vivante c'est la cellule. Beijerinck le premier s'est affranchi de ce dogme et a proclamé de fait que la vie n'est pas le résultat d'une organisation cellulaire, mais derivé d'un autre phénomène qui ne peut dès lors résider que dans la constitution physico-chimique d'une micelle protéique".

Contents of the 5 volumes.

Volume I: Ueber Pflanzengallen. - Over het ontstaan van knoppen en wortels uit bladen. - Bijdrage tot de morphologie der plantengallen. - Recherches sur la contagiosité de la maladie de gomme chez les plantes. - Over normale wortelknoppen. - Die Galle von Cecidomyia Poae an Poa nemoralis, etc. etc. Beobachtungen über die ersten Entwicklungsphasen einiger Cynipidengallen, etc.

Volume II: Beobachtungen und Betrachtungen über Wurzelknospen und Nebenwurzeln. - Über das Cecidium von Nematode Capreae auf Salix amygdalina. - The Gardeniarootdisease. - Die Bakterien der Papilionaceen-Knöllchen. - L'auxanographie ou la méthode de l'hydrodiffusion dans la gélatine appliquée aux recherches microbiologiques. - Le photobactérium lumineux, bactérie lumineuse de la mer du nord. - Les bactéries lumineuses dans leurs rapports avec l'oxygène. - Sur le Kéfir. - Sur l'aliment photogène et l'aliment plastique des bactéries lumineuses. - L. Beissner's Untersuchungen bezüglich der Retinisporafrage. - Culturversuche mit Zoochlorellen, Lichenengonidien und anderen niederen Algen. - Künstliche Infection von Vicia Faba mit Bacillus radicicola. - Ernährungsbedingungen dieser Bacterie. - La biologie d'une bactérie pigmentaire. etc. etc.

Scuola di Assistenza all'Infanzia

Corsi di puericultura e di assistenza all'infanzia conformi ai programmi dell'Opera Nazionale per l'assistenza della maternità e dell'infanzia.

Sono aperte le iscrizioni ai corsi di puericultura che avranno inizio nel prossimo novembre presso la Scuola di assistenza all'infanzia in Via Mentana 9. 9.

I corsi avranno la durata di tre mesi e alla fine dell'anno scolastico alle iscritte che avranno regolarmente frequentato e superate le due prove di esame, teorica e pratica, sarà rilasciato il diploma; a coloro che, avendo frequentato, non si sottoporanno all'esame, sarà rilasciato un certificato di frequenza.

Le domande di iscrizione, in carta bollata da L. 2 dovranno essere rivolte alla Direzione della Scuola, accompagnate dalla quota di iscrizione di L. 20 o di L. 50 per coloro che desiderano ricevere la bellissima pubblicazione mensile dell'Opera Nazionale per l'assistenza della maternità e dell'infanzia.

Per iscrizioni ed informazioni rivolgersi al Prof. Veronese

Via Umberto I. N. 32 nei giorni feriali dalle ore 11 alle 12.
