COLLEGE OF AGRICULTURE  
LOS BAÑOS  
PATHOLOGY DEPARTMENT

April 8, 1920.

Dear Professor Saccardo:-

As your manuscript on Chinese fungi was not quite clear in a number of instances, I have sent a copy prepared for publication back to you for proof reading and correction. I should be pleased to have you go over the arrangement and especially over the Latin descriptions. There are a number of corrections still to be made. Also, a few of the citations to the literature are not clear.

Number 30, Hysterographium mori (Schw.) Rehm. has the wrong collection number, 4679. My records show this number to be of a different collection. If possible, I should like you to check this. Also for number 25, Megalonectria pseudotricha (Schw.) Speg. no collection numbers have been given. The lichens mentioned under number 27 have also been left out.

I should be pleased to have you go over the entire manuscript and return the same at your earliest convenience with all corrections ready for publication in the Journal of Science. Thanking you for your kind consideration in this regard, and your kind cooperation, I remain

Sincerely yours,

  
OTTO A. REINKING,  
Professor of Plant Pathology.

Professor P. A. Saccardo,  
R. Institute Botanico,  
Padova, Italy.
