Phaidra is a repository for the permanent secure storage of digital assets

PHAIDRA Milagro has been established as part of the project Migrants and Local communities Actively GROwing together for inclusive societies (MILAGRO). It functions as a dedicated platform for depositing, searching, and accessing information and publications related to migration studies.
As a subject-specific repository, it provides researchers with a tool for the preservation and dissemination of project outputs and other scholarly works focusing on migration processes.

Phaidra Milagro - Aided value

New repository intends to make a step back into academic environment

clues

EXPERIENCE

- The Milagro project is forcing University library to:
  - adjust
  - learn
  - grow

The mission is same: to help users and to provide information
